RECENT PROJECTS

- **Funding Management System**

This is basically web-based fund collection project I created with my team for the final year. Here we created a platform where user can sign up on this platform and submit all valid documents, after checking the validity admin will approve it and then user can create post for raising funds for needed people and can share this post through social media and then funds will be start coming to the financial needs.

- **Saifullah Integrated Resources**

This is a website which is based on company profile. I have created this website by WordPress using theme, plugin with Elemntor. This project is provided by a local client.

Website link: <https://saifullahintegratedresources.com/>

- **Telephone Lists.biz**

I have created this website with raw coding using HTML,CSS and Bootstrap. This project is provided by a local client.

Website link: https://arpa12.github.io/SharpCodeIT_TelephoneLists/index.html

- **Check Weather**

I have created this website with raw coding using HTML,CSS and JavaScript . This project is provided by a local client.

Website link: <https://arpa12.github.io/Check-Weather/>
